SUPPLEMENT

APPENDIX: 1 sketch

Сер

ORIGIN OF FAX

1. The airfield is situated about two kilometers west of Miskolc on a neck of land between the mountains of the lower Tatra. The field is rectangular in shape, measuring about 1,500 x 1,400 meters, and the surface is of a morainic consistency. The principal entrance is on the southwest side of the field. A secondary entrance is on the southeast side. Outside and parallel with the north side of field there runs a small water trough (aqueduct?). A railroad line runs along the east side about three kilometers from the field.
2. In the southwest portion of the field is a group of installations comprising a fairly large double hangar, barracks for billeting troops, and a number of buildings for storage, lodgings, etc. In the midst of these structures is a kind of basin filled with water which was installed by the Russians.
3. In the southeast corner of the field is a Siemens Suckert type radio station having two fixed antennae. It is reported that all the European programs of Radio Moscow of medium, short, and ultra-short wave lengths are transmitted by this station. The permanent personnel of the station is composed of Russians, Germans, Hungarians, and Bulgarians.
4. The north-south landing strip runs down between the group of installations and the radio station, and the east-west landing strip runs across the field above the installations.
5. The fuel storage area, which exploded and burned in the early spring, is located somewhere along the north side of the field.
6. At the present time, a complete Russian unit equipped with 52 to 54 Storm-vik planes is based on the field. This unit carried out an extensive aerial activity, often taking off in its entirety in the morning and returning at night.

This document contains information affecting the national defense of the United States within the meaning of the Espionage Act of 1917, U.S.C. 32 and 33 as amended. Its transmission or the revelation of its contents in any manner to an unauthorized person is prohibited by law.
